# Landscape Architects

Landscape architecture is a profession that is broad and diverse in scale and scope. It encompasses the analysis, planning, design, management, and stewardship of natural and built environments through science and design. Landscape architects are trained to work on regional and site levels in both planning and design.

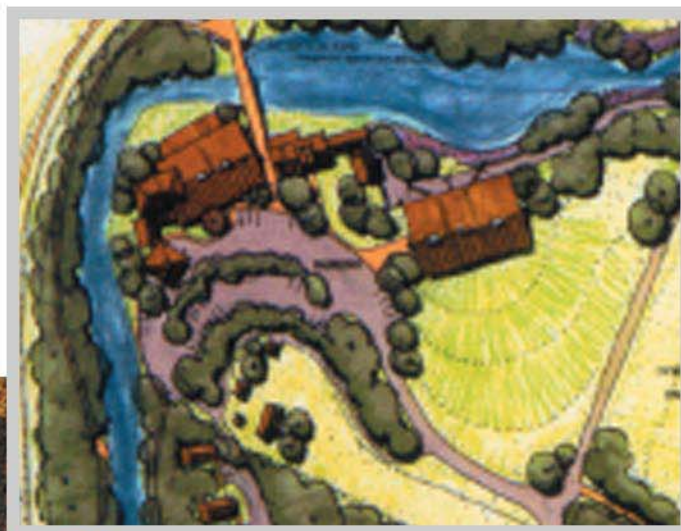

Each project of a landscape architect's is reliant on the education, training and testing required by the profession to protect the public's health, safety, and welfare. Landscape Architects are known for providing quality environments that integrate the natural and built environments in the planning and design of outdoor spaces.

Areas of contribution by Landscape Architects in Virginia include:

- Regional, urban and site scale planning and developments
- Transportation for pedestrians, cyclists and vehicles
- Land conservation planning and implementation
- Natural resource management and protection
- Water resources mitigation and conservation
- Scenic resources, open space and greenways
- Recreational parks, and trail systems and greenways
- Erosion control and stormwater management
- Historic preservation

Susan Nelson - Warren Byrd Landscape Architects - Tidal Garden

Hill Studio, P.C. - Clinch River Heritage District Plan

Carlton Abbott and Partners, PC - Visual Character of the Blue Ridge Parkway
