Inform or Collaborate? Perspectives from a Multidisciplinary Firm on Scaling and Adapting Community Engagement
Scott Wiley, PLA, Shawn Balon, PLA and Trevor Buckley

The answers to these questions will be revealed during the presentation. You might need to know them for the quiz.

1. True or False. Community engagement is an opportunity to build unity among diverse people and to create a positive impact in the places where we work and that we call home.

2. The community engagement spectrum presented includes which of the following actions?
   - Inform, consult, involve, collaborate
   - Inform, reflect, seek, partner
   - Ask, create, involve, collaborate
   - Volunteer, create, collaborate

3. The community engagement spectrum presented draws on the involvement of which of the following?
   - People
   - Processes
   - Products
   - All of the above

4. True or False. Inform is considered as a high level of engagement.

5. True or False. Every community engagement project should always use all spectrum options of inform, consult, involve, and collaborate.

6. Which of the following people (community members and stakeholders) might be included in the community engagement process?
   - Adjacent Landowners
   - Elected Officials
   - Members of the Media
   - All of the above

7. Which of the following is the best process (tools, methods, and strategies) for carrying out community engagement?
   - Community Workshops
   - Web-based Community Surveys
   - Public Information Meetings
   - There is not a single best process, each process should be tailored to the specific project and surrounding community.
8. Which of the following is not a typical **product** (final deliverables and outcomes) resulting from community engagement?
   - Design Recommendations
   - Master Plan Document
   - Speech by an Elected Official
   - Project Website or Web-based Dashboard

9. True or False. Community engagement is not necessary for private development and only applies to public work.

10. True of False. The community engagement spectrum can be used as a tool for organizing the participants and activities that will play a role in the development of a project.
